## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group II drawn to a clip and species of Fig 2 in the reply filed on February 27, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Applicant believes claims 1-5, 21, 22 and 27-30 are readable on the elected species. The examiner respectfully disagrees since Figure 2 does not show the engagement legs being provided with respective helical screw surfaces (claims 27-30). Therefore, claims 1-5, 21 and 22 will be examined.

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because of the reasons found on the attached form PTO-948. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to because of the following informalities:

The title of the invention is too long. A new title is suggested that is clearly indicative of the invention to which the claims are directed. The applicant is reminded:

Title of the Invention: See 37 CFR 1.72(a) and MPEP § 606. The title of the invention should be placed at the top of the first page of the specification unless the title is provided in an application data sheet. The title of the invention should be brief but technically accurate and descriptive, preferably from two to seven words may not contain more than 500 characters.

Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3 and 5 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,947,999 and U.S. Patent No. 5,993,476. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim language of the application is broader.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Richards (U.S. Patent No. 4,887,601).

Richards discloses a clip that has at least two engagement legs, provided with gripping surfaces (see Fig. 2), extending approximately parallel to one another including respective distal bridging tips and respective proximal insertion tips as well as a connecting bridge coupled to the distal bridging tips of the two engagement legs that are at least two elongated section extending along side on another. The elongated section extends along a non-linear trajectory and includes one of a depression and a dome (see Fig. 1). Also disclosed is that the engagement legs and the connecting bridges are constructed from a biocompatible material (Col. 4, lines 29-31).
